

PLEASE do not weaken our existing protection from telemarketers. If anything, realtors should be prohibited from calling also. If I want to buy or sell a house, what are the odds that they will know it before I do.

As far as them thinking they have a right to use public phone lines, that's fine. But once that line comes into my house, and rings my phone, it's my private property and I prefer that unsolicited callers, KEEP OFF!
Thank you for your consideration
